Professional Summary

Computer Engineering student at International Institute of Information Technology (I²IT), Pune, passionate about Artificial Intelligence, Machine Learning, Computer Vision, and Full Stack Development. Experienced in building AI-powered applications and modern web solutions using Python, Java, React, and Node.js. National hackathon winner with strong problem-solving and teamwork skills.

Technical Skills

Programming Languages: Python, Java, C, JavaScript, SQL

Web Development: HTML5, CSS3, React.js, Node.js, Express.js

AI & Computer Vision: YOLOv8, OpenCV, Roboflow, Machine Learning, Computer Vision

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Postman, AWS

Embedded Systems & Hardware: Arduino UNO, ESP32-CAM, Sensors, IoT Systems

Projects

PrivacyGuardAI | *Python, JavaScript, Browser Extension, VS Code Extension, LLM Security*

- Developed a browser extension to prevent sensitive credentials and confidential data from being sent to cloud-based Large Language Models (LLMs).
- Built a VS Code extension that blocks sensitive code and secrets from being shared with GitHub Copilot.
- Implemented real-time detection and protection mechanisms to enhance AI-assisted development security.

MPCB (Maharashtra Pollution Control Board) - Government Project | *React, Node.js, MongoDB, Supabase, AWS*

- Developed a real-world data management system for monitoring sewage inlet and outlet parameters.
- Designed dashboards for recording, tracking, and analyzing environmental monitoring data.

Automated AI Solar Panel Cleaning System | *ESP32-CAM, Arduino IDE, Computer Vision, IoT*

- Designed an intelligent solar panel cleaning system that detects dust accumulation using computer vision.
- Automated the cleaning process using a sprinkler and wiper mechanism to improve solar panel efficiency.
- Developed a low-cost solution targeted for residential and small-scale solar installations.

Hand Motion Gaming Control System | *Python, OpenCV, Computer Vision*

- Implemented real-time hand gesture recognition using OpenCV for touch-free game interaction like Fruit-cut, Snake-game, Hill-Climb.
- Optimized gesture detection for smooth and responsive gameplay experience.

Epicontrol AI | *Python, AI, Reinforcement Learning, Full Stack*

- Developed an AI-powered platform for intelligent monitoring, automation, and decision support.

Experience

AI/ML Intern

CyberXDelta

2026(Three months)

- Worked on Retrieval-Augmented Generation (RAG), chatbot accuracy improvement, and API testing.
- Contributed to **ITRACE**, an AI-powered intelligent tracking, monitoring, and analytics platform for real-time data visualization and decision support.

AI/ML Intern

SkillForge

2025(Three months)

- Worked on Artificial Intelligence and Machine Learning projects using Python.
- Developed practical solutions involving data processing and machine learning concepts.

Achievements

Winner – National Level Hackathon at MIT-WPU

March 2026

Winner – National Level CUK CS Aithon at central university Of Karnataka

Jan 2026

Finalist –Top 4 at UrbanAI Challenge 2026 worldwide

July 2026

Certifications

Cisco – Introduction to Networks (CCNA)

Tata Group – GenAI Powered Data Analytics Job Simulation (Forage)

NIELIT CCC Certification (Grade A)

MCCE C Programming Certification (Grade A)

Leadership & Activities

Active participant in national hackathons and innovation challenges.

Passionate about Artificial Intelligence, Embedded Systems, and Smart Automation.

Strong team player with experience working in collaborative development environments.

Areas of Interest

Artificial Intelligence • Machine Learning • Computer Vision • Full Stack Development • Internet of Things (IoT) • Software Engineering

Education

International Institute of Information Technology (I²IT), Pune

2024 – 2028

Bachelor of Engineering, Computer Engineering

CGPA: 9.70 / 10
